SUMMARY

Data Engineer with 3 years of professional experience across data engineering, data warehousing, data modeling and data pre processing using Pandas, with a strong interest in machine learning. Began my career in 2023 after building a solid foundation in web scraping, data analysis using pandas, and automation. Proficient in Python, SQL, AWS and MS Fabric services such as S3, Lambda, RDS, OneLake with hands-on experience in automation using Selenium and data extraction using BeautifulSoup. Experienced in creating analytics-ready datasets and visualizations using Power BI and Apache Superset, deploying applications with Docker, and managing code using GitHub. Focused on building scalable, cloud-based data systems and continuously improving data workflows.

WORK EXPERIENCE

Data Engineer, Wizr AI

July 2026 - Present

- Built a pipeline to ingest data from Azure into Microsoft Fabric OneLake, using Fabric notebooks for data transformations.
- Implemented both scheduled and event-based trigger mechanisms to run the pipeline, exploring Fabric's orchestration options beyond simple batch runs.
- Gained hands-on experience with OneLake's Lakehouse storage layer and how it integrates with upstream Azure data sources.

Skills Acquired: Microsoft Fabric, OneLake, Delta Parquet, Fabric experiences, Fabric Notebooks, PySpark, T-SQL.

Data Engineer, QBurst Technologies

Sept 2023 - July 2026

- Built and managed an end-to-end AWS data pipeline using S3, Lambda, and RDS, performed analytics using AWS Glue and Athena, and provisioned cloud infrastructure using Terraform.
- Deployed a FastAPI application using Docker for a visualization-platform migration tool, integrating Claude and GPT models to dynamically generate assessment questionnaires, and the feasibility reports for migration planning.
- Developed a Python-based command-line preprocessing tool using Pandas and dbt during training, capable of processing files and storing transformed data in PostgreSQL.

Skills Acquired: Data modeling, dbt, AWS S3, RDS, Glue, Athena, Lambda, Terraform, Python, Pandas, Docker, FastAPI, Apache Superset, pytest, Gitlab CI/CD, Power BI, LLM integration.

Web Scraper, Datahut

Oct 2022 - Aug 2023

- Built and maintained 10+ automated web scrapers using BeautifulSoup (XPath) and Selenium, extracting structured data from diverse and dynamic websites.
 - Processed and cleaned 50K+ records using Pandas and OpenRefine, preparing high-quality datasets for analysis and downstream consumption.
 - Authored 10+ technical blog articles documenting web scraping and data processing techniques, improving internal knowledge sharing and external reach.
-

PROJECTS

Data Migration Platform | Python

2025 - Present

- Built a FastAPI-based feasibility assessment tool for visualization-platform migrations, where Claude and GPT models dynamically generate context-aware questionnaires and a migration planning assessment report.
- Applied prompt engineering and techniques to ensure consistent JSON responses from LLMs.
- Contributed in containerizing the application using Docker for consistent deployment.

Retail Automation | Python, AWS S3, AWS RDS, Apache Superset

2023 - 2024

- A cloud-enabled retail platform integrating POS, e-commerce, warehousing, and inventory management with automated data pipelines and infrastructure provisioning.
- Automated ETL pipelines using AWS Lambda and created analytics dashboards in Apache Superset for real-time insights.
- Managed AWS infrastructure using EventBridge, Lambda, and S3 for seamless, automated deployments.

Amazon Web Scraper | Python, BeautifulSoup, Pandas, Selenium

2023

- Built an automated web scraper using BeautifulSoup and Selenium to extract product details across categories with pagination support.
- Cleaned and analyzed the dataset using Pandas to derive pricing, ratings, trends and insights, exporting structured data for downstream use.

ADDITIONAL INFORMATION

- **Technical Skills:** Python, SQL, AWS (S3, Lambda, RDS, Glue, Athena), Terraform, Pandas, BeautifulSoup, Selenium, Power BI, Apache Superset, Github, Docker, pytest, Gitlab CI/CD, LLM, Fine tuning, Prompting
- **Certifications:** AWS Certified Cloud Practitioner, AWS Certified AI Practitioner, Power BI Data Analyst Associate.

EDUCATION

BTech in Computer Science and Engineering

July 2019 - June 2023

College of Engineering, Chengannur
